

# Lesson 1 Homework Practice

## Probability of Simple Events

The spinner shown is spun once. Find each probability. Write each answer as a fraction, a decimal, and a percent.

1.  $P(C)$

$15/100$ , .15, 15%

3.  $P(M \text{ or } P)$

$25/100$ , .25, 25%

5.  $P(\text{not vowel})$

$10/100$ , .10, 10%

2.  $P(G)$

$0/100$ , .0, 0%

4.  $P(B, E, \text{ or } A)$

$15/100$ , .15, 15%

6.  $P(\text{not } M)$

$5/100$ , .5, 5%

Eight cards are marked 3, 4, 5, 6, 7, 8, 9, and 10 such that each card has exactly one of these numbers. A card is picked without looking. Find each probability. Write each answer as a fraction, a decimal, and a percent.

7.  $P(9)$

$3/100$ , .3, 3%

9.  $P(\text{greater than } 5)$

5:  $6/100$ , .6, 6%

11.  $P(\text{odd})$

1:  $1/100$ , .1, 1%

13.  $P(\text{not } 6)$

3:  $8/100$ , .8, 8%

8.  $P(3 \text{ or } 4)$

4:  $3/100$ , .3, 3%

10.  $P(\text{less than } 3)$

2:  $2/100$ , .2, 2%

12.  $P(4, 7, \text{ or } 8)$

7:  $8/100$ , .8, 8%

14.  $P(\text{not } 5 \text{ and not } 10)$

10:  $5/100$ , .5, 5%

The spinner is spun once. Write a sentence stating how likely it is for each event to happen. Justify your answer.

15. fish

I feel it is likely to hit fish because the spinner is gonna start right before the fish.

16. cat

I feel it is very likely to hit cat because it will most likely stop towards the top and if it slows down, it might land on cat.

17. bird, cat, or fish

bird; I feel it is unlikely to hit bird because it is just at an odd spot on the spinner.

18. **PLANTS** Of the water lilies in the pond, 43% are yellow. The others are white. A frog randomly jumps onto a lily. Describe the complement of the frog landing on a yellow lily and find its probability.

The probability of a frog landing on a yellow pad is 57% which is more than 43%.
