Lesson 4 Skills Practice

Simulations

1. QUIZZES Describe a situation that you could use to answer a 15-question quiz, if five questions are true or false questions.

you can use a two sided spinner and spin it 15 times

2. PRIZES During the grand opening of a fast food restaurant, every person that comes to the the restaurant receives a prize. There are 6 different prizes. Describe a model that could be used to simulate which prizes the first 75 customers will receive.

you can have a hat with 6 prizes and pick out of it 75 times

3. STUDENT COUNCIL Mrs. Corley wants to randomly choose 3 students to represent her homeroom on student council. There are 30 students in the class. Describe a model that could be used to simulate this situation.

you can put 30 names on a board and pick 3 names off blindly

4. SALES A music store has determined that 65% of customers who buy a compact disc buy a pop music compact disc. Describe a model that you could use to simulate a CD purchase.

take a wheel and put 65% and a 35% on it

5. SANDWICHES A sandwich shop offers 6 different types of sandwiches on either white or wheat bread. If each type of sandwich and bread is equally likely to be chosen by a customer, describe a model that could be used to simulate the orders of the next 10 customers.

put the 6 sandwich names in it and put 10 times
