

End-of-Year Wrap-Up

Name Natalee Costa

Date 6/1/21

Period 4

Please write at least two sentences for each question.

1. Which math topic do you feel is your best? Why?

I felt I was the best at circumference, all of our probabilities, and any two step equations. I felt I was best at these because they were pretty simple for me. and I liked doing them so personally for me it helped me understand it more because I was interested in those lessons.

2. Which math topic do you feel is your worst? Why?

I felt I was the worst at finding the area of any 3d figures or shapes. I felt it was my worst because I often got the questions wrong, it was confusing, and there were a lot of rules that I had to follow that I kept forgetting to do/add to my equations.

3. What two or three things would you change about our math class?
(You may not say "Too much homework." Sorry!)

Three things I would change were the notes if we were gone, or missed a page, for them to be posted on google classroom, and honestly that's all I had a problem/disagreeing with.

4. Which topics did we spend too much time on?

I felt that we took a decent amount of time for all of the lessons, so for me none.

5. Which topics did we spend too little time on?

I think we spent too little time on finding the circumference, I liked it a lot so thats why I think I wanted to do more on that specific lesson.

6. What are two or three things that you would suggest to improve our math class? Do you have any ideas that could make math class more interesting?

I think it would be fun to have someone work on one problem too see if theyre right. So kind of like popcorn reading insteaad of everyone at once telling what they got.

7. Do you have any other comments or suggestions for me?

Nope, class was fine.
